

勒索病毒之友善提醒:

一款新型的勒索病毒 WannaCry (WanaCrypt0r 2.0) 最近以極快的速度擴散，全球許多國家包括歐洲、台灣都成了這款勒索病毒的重災區，災情極為嚴重，強烈建議不要忽略這次的危機。

所謂勒索病毒，會將你電腦中的檔案加密，並要求支付贖金，否則就再也無法開啟檔案。這款 WannaCry 將你電腦中的檔案加密後，會要求在三天內支付 300 美金作為贖金，若沒有付款、贖金會再加倍，七天內再沒有付款，就會刪除解密金鑰。

目前確定會受到感染的作業系統為 Windows XP、Windows Vista、Windows 7/8/8.1，若受感染相關畫面如下圖。

The screenshot shows the ransomware's payment interface. At the top, it says "Oops, your files have been encrypted!" with a language dropdown set to "Chinese (simplified)". Below this is a large padlock icon. The interface is divided into several sections:

- Payment will be raised on:** 1/4/1970 08:00:00. A "Time Left" counter shows 00:00:00:00.
- Your files will be lost on:** 1/8/1970 08:00:00. A "Time Left" counter shows 00:00:00:00.
- Payment Method (付款方法):** States that only Bitcoin is accepted. It provides links for "About bitcoin", "How to buy bitcoins", and "Check Payment". It also includes a warning about the time needed for payment and a note about the best confirmation times (Monday to Friday, 9 AM to 11 AM).
- Contact Us (联系方式):** Provides a link to "Contact Us" and a strong recommendation to avoid unnecessary trouble by not closing the software before recovery is complete.
- Bitcoin Payment:** A "Send \$600 worth of bitcoin to this address:" section with a Bitcoin logo and the address "12t9YDPgwueZ9NyMgw519p7AA8isjr6SMw". A "Copy" button is next to the address.
- Buttons:** "Check Payment" and "Decrypt" buttons are at the bottom.

故建議旅行同業立即進行下列三項防範動作:

- 一、 立即更新進行 Windows Update。
- 二、 重要檔案備份隨身硬碟。
- 三、 不開啟來路不明之郵件及廣告。
